Procedure: COLD PROCESS

1. In main tank combine the ingredients of phase I and begin homogenizing with sweep. (Silverson used in lab)
2. In side container and with mixing combine the ingredients of phase II as listed allowing each to become incorporated before adding the next.
3. In multiple parts or in a very slow steady stream begin adding phase II to phase I. Maintain speed.
4. Once complete sift in phase II and continue homogenizing for approximately 10-15 minutes.
